Educational Outcome Goals/Course Overview

In the 21st century, life and work are conducted in a dynamic context that includes:

• A global society facing complex political, economic, technological, and environmental challenges.

• A service economy driven by information, knowledge, and innovation.

• Diverse communities and workplaces that rely on cross-cultural collaborative relationships and virtual social networks.

• An intensely competitive and constantly changing worldwide marketplace.

Providing New Jersey students with the life and career skills needed to function optimally within this dynamic context is a critical focus and organizing principle of K-12 public education. New Jersey has both an obligation to prepare its young people to thrive in this environment, and a vested economic interest in grooming an engaged citizenry made up of productive members of a global workforce that rewards innovation, creativity, and adaptation to change.

**Mission:** 21st-century life and career skills enable students to make informed decisions that prepare them to engage as active citizens in a dynamic global society and to successfully meet the challenges and opportunities of the 21st-century global workplace.

**Vision:** The systematic integration of 21st-century life and career skills across the K-12 curriculum and in career and technical education programs fosters a population that:

• Applies critical thinking and problem-solving skills to make reasoned decisions at home, in the workplace, and in the global community.

• Uses effective communication, communication technology, and collaboration skills to interact with cultural sensitivity in diverse communities and to work in cross-cultural teams in the multinational workplace.
• Is financially literate and financially responsible at home and in the broader community.

• Demonstrates creative and entrepreneurial thinking by recognizing and acting on promising opportunities while accepting responsibility for possible risks.

• Is knowledgeable about careers and can plan, execute, and alter career goals in response to changing societal and economic conditions.

• Produces community, business, and political leaders who demonstrate core ethical values, including the values of democracy and free enterprise, during interactions with the global community.

Through instruction in life and career skills, all students acquire the knowledge and skills needed to prepare for life as citizens and workers in the 21st century.

• In Preschool, children’s social and emotional development provides the foundation for later learning about careers and life skills (http://www.nj.gov/education/ece/code/expectations/).

• In grades K-5, students are introduced to 21st-century life skills that are critical for personal, academic, and social development. They are also introduced to career awareness information and to basic personal financial literacy skills.

• In grades 6-8, students continue to develop 21st-century life skills and personal financial literacy, while also exploring careers that support their academic and personal interests and aptitudes. As they prepare for the transition to high school, students are provided with opportunities to apply knowledge and skills learned in the classroom to real or simulated career challenges.
